

PHYSICAL SECURITY made easy for Nuclear Power Sites

Monitor, deter, and respond to threats in real time, no manual monitoring required.

- New layer of security delivers wide area surveillance
- Alarms & alerts as events occur... only on actual threats
- Audible alarms & lights triggered to deter intruders
- Cameras slew to track intruders
- Operators receive comprehensive information from all layers of security
- Install on existing infrastructure
- Standard power on your network

Automated remote security for:

- PLANT SITE PERIMETERS
- RIVERSIDE AREAS
- ADJACENT TRANSMISSION SITES

Wide-area surveillance for
fastest notification,
deterrence, and response
